ABOUT ME

Web Developer specialized in React, Next.js and TypeScript. I am driven by building interfaces that are both efficient and enjoyable to use. I learn quickly, adapt well to new challenges and value clear communication within the team. I have experience developing features for real-world projects, applying agile methodologies and solving day-to-day technical problems.

PROFESSIONAL EXPERIENCE

Web Developer Trainee | TruckerTalent

September 2025 - November 2025

Stack: JavaScript, React, Tailwind CSS

During my web development internship on the TruckerTalent project, I proposed several changes to tools and technologies that improved the development process and proved beneficial for the project. I focused on building the chat, the task board and the job listings section. I also served as project manager for a period, tracking my teammates' work.

Web Developer Trainee | SwaplyAr

November 2024 - December 2024

Stack: TypeScript, React, Tailwind CSS

During my internship as a developer at SwaplyAr, I worked on key features for the financial platform. I built the complete refund system, including the interactive form with duplicate validation and request statuses, and the request-editing interface with receipt attachments. I implemented responsive design to ensure a proper experience on mobile devices. I strengthened my frontend development skills and worked with agile methodologies in collaboration with the technical team.

EDUCATION

Instituto 9 de Julio - Tucumán Associate Degree in Software Development March 2025 - Present	Rolling Code School Full Stack Web Development Bootcamp March 2024 - November 2024
